

- The predictive interim assessments provide an estimate of a student's future performance on Kansas summative assessments. The assessments also allow educators to evaluate students' knowledge and skills in a subject and are designed to inform decisions both at the classroom level and beyond (e.g., at the school or district level). To keep the assessment length short, the total number of items that students respond to are limited. The predictive interim assessments do not support any inferences about performance at standard level because measurement best practice would require substantially more items per standard in order to provide an accurate measure of whether the student knows the content of each standard. However, the predictive interim assessments support the inferences made about clusters at the classroom level and beyond because student responses are aggregated and thus more reliable.
- The cluster map resource documents include the clusters embedded in the 2017 Kansas standards and a table mapping each item on the predictive interim assessments to the cluster and item description. In a cluster map resource document, there are two parts: a cluster key table and a cluster mapping table. The cluster key table includes the cluster code and cluster description as well as its domain, and the cluster mapping table links each item with the cluster it is measuring.
- Teachers could use this resource to identify items measuring the same cluster or domain. Combining this resource with information from the school or district report, teacher also could make inferences about school or district performances on clusters or domains. If the whole school performed better than the state average on the majority of items measuring the same cluster or domain, then the teacher could infer that the students in the school likely understood the knowledge and skills of this cluster or domain. If the whole school performed worse than the state average on the majority of items measuring the same cluster or domain, then the teacher might want to spend more instruction time on this cluster or domain.
- Although there are more items measuring one cluster or domain than one standard, the predictive interim assessment still do not support any inferences made about clusters or domains at student level because the number of items per cluster or domain is still not large enough to provide an accurate measure of whether the student understands the content of each cluster or domain.

Item	Cluster	Item Description
Position		
1	W.8.TTP	Use precise language for clarity in informational text; clear context
2	W.8.TTP	Maintain formal style; revise for audience and purpose
3	W.8.TTP	Maintain formal style; revise for purpose; informal distractors
4	W.8.TTP	Use relevant support; edit for clarity so text has strong sequence
5	W.8.LW	Use conditional mood; combine simple sentences
6	W.8.TTP	Understand transitions in narratives; indicate sequence of events
7	W.8.LW	Identify two misspelled words; all words are possible answers
8	W.8.LW	Use ellipses to indicate pause and interrupting flow of thought
9	W.8.TTP	Maintain formal style in argumentative writing; revise for audience
10	RI.8.KID	Determine a central idea; clearly stated in text; synthesis of whole text
11	RI.8.CS	Analyze author's purpose for using particular text device
12	RI.8.KID	Cite evidence related to central idea of text to support a conclusion
13	RI.8.LR	Determine meaning of metaphoric language from use; clear in-text context
14	RI.8.LR	Determine meaning from use; clear context in designated paragraph
15	RI.8.KID	Draw a conclusion; distractors relate to conclusion but do not support it
16	RI.8.KID	Analyze common elements related to a key detail; explicitly stated in text
17	RI.8.KID	Cite evidence to support conclusion; requires synthesis of paragraphs
18	RL.8.KID	Draw a conclusion about character emotions; event is central to the plot
19	RL.8.LR	Determine meaning of idiomatic language; question provides quoted
		material
20	RL.8.CS	Determine meaning from use; academic word; distractors do not fit context
21	RL.8.KID	Cite evidence to support an inference on relationship of setting to event
22	RL.8.KID	Cite evidence to support an inference; evidence is direct support
23	RL.8.KID	Make an inference on character emotions with explicitly stated details
24	RL.8.KID	Analyze relationship between plot development and character; stated in text
25	RL.8.KID	Make an inference about character; explicitly stated with repeated details
