

Optimum Release Notes

Educator Portal (EP)

April 2022

New features included in this release:

- **DLM School Aggregate Reports Now Available as CSV** - Previously, this bundle of reports was only available in PDF format. This new feature will allow states to download a CSV version of these reports. This will make it easy for districts to upload their students' score information into their district school information system. The CSV will include the student's name, teacher name, school name, and grade level as well as the EEs that were tested, EEs that were at or above target, skills mastered, and achievement level.
- **Enhancements to Custom State GRFs** - Missouri, which has a custom GRF, has a new column that includes the Total Linkage Levels Mastered. Maryland, which also has a custom GRF, will see a new Course column populated in their file.
- **GRF Upload User Interface (UI) Prevents Multiple Requests** - All states will now see a change to the GRF Upload UI. After a user clicks the "Approve" button, the button will now be hidden, indicating that the request has been processed and prevent a request being sent multiple times. A new message stating who approved the GRF and when they approved it will now appear.
- **KAP Student Score Extract Now have Columns for SC Codes & Median Calculations** - The KAP Student Scores (Current, Specified, & Tested Students) Extract now contains a column that includes the SC Code that was applied to the student's test record. Additionally, there is now a column that indicates whether this student was included in the district and/or school median calculation.

Kite[®] Suite elements that have been updated:

- **KAP Report Text Updates for Pandemic Impact on Scoring** - Reports for KELPA and KAP have been updated with new language to reflect new messaging about the pandemic's effect on scoring.
- **Parent Portal Communication on Report Delivery Schedule, Grade 10 Math** - Grade 10 math reporting is now configured to account for Grade 10 math score delays due to cut scores not being available. Parent Portal has been updated to include information about KAP Grade 10 math assessments being delayed until cut scores are established by KSDE.
