

Yaw Minor Release 2 Notes

Kansas Assessment Program

September 2025

The following features are included in the most recent release of Kite® Educator Portal and Kite® Student Portal.

New features:

- **Configurable Interim District Test Window** – Districts can reach out to the Kite Service Desk and request an end date for their district within the state Interim Test Window. Districts who opt to complete testing early will receive finalized data for the district at that time, including reports generated for students left in progress and finalized data on the Interim Interactive Reports.
- **Educator Portal MFA Trusted Device** – Multifactor Authentication has been updated to allow EP users to 'Remember this device for 30 days'. This update decreases the frequency of entering the MFA code on a trusted device and specific browser. When the browser cookies are cleared or if the browser is set to clear cookies each time the window is closed, EP will not be able to remember the device, and you will need to enter an MFA code.
- **KAP School and District Reports** – The 2025 KAP Summative School and District reports have been updated to include a table with the percentage of students at the school or district that matched or exceeded the state average for each category.
- **School Testing Times** – School testing times can be set in Educator Portal to restrict students access to assessments outside of school hours. When a student attempts to access a test in Student Portal outside of the school testing times set, they will receive the message 'This test is not available. Please ask your test administrator when you will be able to access it.' and will not be able to access the test.
- **Display Remaining Character and Set Character Limit** – The character limit and the available remaining characters can be displayed on extended response items, when the configuration is set at item creation.
- **Calculator Display Update** – A single calculator can now be opened and used at a time in Student Portal.

Updated features:

- **Updated Scoring Portal Kite Technologies** – The Kite Scoring Portal application technologies were updated to meet or exceed industry standards for security. The technology updates keep Scoring Portal data secure and stable.
